Full closure of Germantown Road as repairs continue in Maysville *Closure expected to begin Friday morning, Oct. 28*

FLEMINGSBURG, Ky. – Contractors will completely close Germantown Road (KY 3056) in Maysville this week as work continues on a Kentucky Transportation Cabinet slip repair project.

The state highway has been subject to daytime closures since early October when crews began installing railroad T-rail to stabilize the embankment between KY 8 and Winton Wood Drive.

The next step – rebuilding about 900 feet of roadway – requires full closure of Germantown Road so contractors can replace the existing pavement with new asphalt. Closure is expected to begin Friday morning, Oct. 28, and will continue around the clock for an estimated two weeks. The roadway will reopen once construction is complete.

Throughout the repairs, roadway message signs will be used to communicate specific schedules or changes in schedules to local residents and the public. Updated information will also be available online through Kentucky Department of Highways District 9's web page at <http://transportation.ky.gov/district-9> under Road Reports.

The project is the culmination of a multi-agency effort that began in late April when Germantown Road, which serves 700 to 800 vehicles a day, suffered slip damage following a period of heavy rains.
